### Let Run Policy Adams Township Water Department

This policy pertains to Adams Township residents receiving water service from the Adams Township Water Department.

1. Only in extreme winter weather of extended cold periods will the Water Department consider allowing customers to let their water run.
2. If the Water Department implements this policy during extended periods of extreme cold weather, water customers (homeowner/landlord/renter/business) **MUST HAVE APPROVAL** from the Adams Township Water Department before allowing water to run continuously in an effort to prevent lines from freezing.
3. Customers on this list will receive a monthly bill equal to an average of the three previous **ACTUAL** water usage readings.
4. This policy in no way makes the Adams Township Water Department responsible for thawing customer's water lines.

In an effort to prevent water lines from freezing, plowing snow away from areas where water lines are buried is strongly discouraged.

Motion passed unanimously and was carried by the Adams Township Board.  
Let Run Policy was adopted on December 9, 2015.
